

PromptVault — Complete Development Blueprint

AI Prompt Discovery Platform Stack: HTML + CSS + JavaScript + Node.js + Express + Firebase

1. What You Are Building

PromptVault is a modern AI prompt discovery platform focused on discoverability, SEO, and premium UI/UX. Users can search, explore, and copy AI prompts for tools like Midjourney, ChatGPT, Leonardo AI, and DALL·E.

2. Final Tech Stack

Frontend: HTML5, CSS3, JavaScript

Backend: Node.js + Express.js

Database: Firebase Firestore

Authentication: Firebase Auth

Hosting: Firebase Hosting

Storage: Firebase Storage

3. Core Website Features

- Homepage with trending prompts
- Search and filtering system
- Prompt detail pages
- Copy-to-clipboard functionality
- Category and tool pages
- Admin dashboard
- Submission system
- SEO optimized URLs

4. Website Pages

Homepage — discovery and search

Prompt Listing — browse all prompts

Prompt Detail — full prompt information

Category Pages — grouped prompts

Tool Pages — prompts by AI tool

Submit Page — public submissions

Admin Dashboard — content management

5. Firestore Database Structure

Main collections:

- prompts
- categories
- submissions
- users

6. Example Prompt Document

```
{ "title": "Cinematic Portrait", "slug": "cinematic-portrait", "prompt_text": "...", "category": "portrait", "tags": ["cinematic", "realistic"], "copy_count": 421, "view_count": 2100 }
```

7. API Endpoints

GET /api/prompts

GET /api/prompts/:slug

POST /api/prompts/copy

POST /api/submissions

8. UI Design System

Primary Purple: #6C3FE8

Background: #0F0F1A

Card Background: #1A1A2E

Text: #FFFFFF

Font: Inter + JetBrains Mono

9. UI Components

- Prompt Cards
- Search Bar
- Filter Sidebar
- Copy Button
- Toast Notifications
- Responsive Navbar

10. SEO Strategy

Every prompt must have a unique URL.

Example:

/prompts/cinematic-anime-girl

Add meta tags, sitemap.xml, robots.txt, and OpenGraph support.

11. Admin Dashboard Features

- Add/Edit/Delete prompts
- Approve submissions
- Manage categories
- Analytics overview
- Manage trending prompts

12. Performance Optimization

- Lazy loading images
- Compress assets
- Pagination for prompts
- Avoid large JS bundles
- Mobile-first responsive design

13. Development Timeline

Week 1 — Firebase + Homepage

Week 2 — Prompt pages

Week 3 — Search and filters

Week 4 — Admin dashboard

Week 5 — SEO + Deployment

14. Final MVP Scope

Launch initially with:

- Homepage
- Prompt listing page
- Prompt detail page
- Copy button
- Admin upload panel
- Search system

15. Final Advice

Focus on UI polish, SEO structure, responsive layouts, and prompt quality. The hardest part of this project is consistency and user experience, not backend complexity.
